

CODE:

The screenshot shows the Eclipse IDE with the Bootstrap.java file open. The code is as follows:

```
1 package bootstrap;
2
3 import java.time.Duration;
4 import org.openqa.selenium.By;
5 import org.openqa.selenium.WebDriver;
6 import org.openqa.selenium.chrome.ChromeDriver;
7
8 public class Bootstrap {
9
10     public static void main(String[] args) {
11         System.setProperty("webdriver.chrome.driver", "/home/tb19/Downloads/Compressed/BrowserDrivers/chromedriver");
12         WebDriver driver = new ChromeDriver();
13         driver.manage().timeouts().implicitlyWait(Duration.ofSeconds(5));
14         driver.get("https://www.jquery-az.com/boots/demo.php?ex=63.0_2");
15         driver.manage().window().maximize();
16         driver.findElement(By.className("multiselect-selected-text")).click();
17         driver.findElement(By.xpath("/html/body/div[3]/table/tbody/tr[2]/td[3]/div/span/div/ui/11[3]/a/lable")).click();
18         System.out.println(driver.findElement(By.xpath("/html/body/div[3]/table/tbody/tr[2]/td[3]/div/span/div/ui/11[3]/a/lable").getText());
19         System.out.println(driver.findElement(By.className("multiselect-selected-text")).getText());
20     }
21 }
22 }
```

The screenshot shows the Eclipse IDE with the Bootstrap.java file open and the TestNG output console. The code is the same as in the previous screenshot. The TestNG output console shows the following messages:

```
Bootstrap [Java Application] /usr/lib/eclipse/plugins/org.eclipse.justi.openjdk.hotspot.jre.full.l...
Please see https://chromedriver.chromium.org/security-considerations for su...
ChromeDriver was started successfully.
